PROPAGANDA AND FORCED RUSSIFICATION

- Billboards with the slogans “Russians and Ukrainians are one nation, one whole” and “Russia is here forever” appeared in Nova Kakhovka.

<https://t.me/uniannet/65737>

- According to the Defence Intelligence of the Ministry of Defence of Ukraine (hereinafter - GUR MoD), the Russian Federation has released a "Handbook for the citizens of Ukraine on organizing resistance to the Kyiv puppet government." The publication provides detailed advice to collaborators on sabotaging work in socially significant areas. The Handbook is full of propaganda of hatred for everything Ukrainian with the appropriate set of terminology: Kyiv junta, puppet government, Nazis, etc.

<https://t.me/DIUkraine/991>

- The so-called head of the Investigation Department of the Prosecutor General Office of the DPR, Aleksey Kutsurubenko, announced the end of the “investigation” on the events of March 16, when the Russian army launched an airstrike on the Donetsk Oblast Drama Theater in the city of Mariupol.

According to the so-called Prosecutor General Office of the DPR the explosion occurred inside the theater building, and allegations of a Russian airstrike are fake. Kutsurubenko said that the total death toll is 14 people, and the source of the unpleasant smell around the building is not the cadaverous odor from a large number of bodies buried under the rubble, but stocks of rotten fish that were stored in the basement.

It is worth noting that according to the information of the Mariupol City Council, on March 16, about 300 civilians were killed in the building of the Drama Theater, according to the investigation of the Associated Press - 600 people.

<https://bit.ly/3d05tpj>

- The Russian invaders released the ABC of Kherson, the idea by Oleksandr Kofman, a resident of the temporarily occupied Makiivka, who previously held the post of the so-called Minister of Foreign Affairs of the DPR. The children's brochure contains lines about "how Suvorov drove the enemies away from the Russian shores," referring to the Ukrainian lands - the Kinburn Spit in the Mykolaiv oblast.

https://t.me/matanaliz_kofman/1366

- In Kherson, the occupation administration is trying to instill a pro-Russian worldview among Ukrainian youth. One of the main elements of this policy is the so-called military-patriotic education. To this end, "public organizations" are being actively formed, such as Young Builders of Kherson oblast, Youth of Kherson and others. The participation of Ukrainian youth in them is increasingly becoming compulsory. At the same time, the older generation of the oblast is involved in newly created organizations, among which are the Union of Mothers of Kherson Oblast, the Organization of Veterans of Kherson Oblast.

To create an impression of mass support of the occupation regime by local youth, participation in the project Your Step, organized by the Ministry of Education of the Russian Federation, is actively promoted. The all-Russian children's and youth competitions Planet of Big Changes and Big Change have been announced in the occupied territories.

<https://t.me/DIUkraine/942>

- In temporarily occupied Severodonetsk, the stele at one of the entrances to the city was renamed SeverSLONetsk, since one of the Russian soldiers with the call sign Slon (Elephant) was killed during the assault on the settlement by the Russian military.

<https://t.me/uniannet/65438>

- In Mariupol, at the humanitarian aid centers, the newspapers of the so-called DPR are distributed.

<https://t.me/andriyshTime/1931>

- In Mariupol, the invaders form militarized detachments, where children and teenagers in uniform march and sing Soviet songs. The corresponding video was published by the head of the Mariupol TV channel Mykola Osychenko. According to him, at the moment there are several military-patriotic camps on the territory of the agricultural enterprises of the Mariupol oblast seized by the invaders.

<https://t.me/NickolayOsychenko/91>

- In the port of Mariupol, with the participation of the head of the so-called DPR Denis Pushilin opened a memorial plaque to the sailors of the Russian Navy who died during the fighting to "unblock the port of Mariupol".

PREPARATIONS FOR PSEUDO-REFERENDUMS ON THE ACCESSION OF THE OCCUPIED OBLASTS TO THE RUSSIAN FEDERATION

- The "head" of the occupation administration of Zaporizhzhya oblast, Yevhen Balytskyi, signed a decree on the creation of an "election commission for holding a referendum on joining the Russian Federation."

<https://t.me/BalitskyVGA/80>

- At the disposal of the Security Service of Ukraine (hereinafter - the SSU) were the appeals of members of the public movement Donetsk Republic to the head of the so-called DPR, Denis Pushilin, with a request to initiate a referendum on the entry of the pseudo-republic into the Russian Federation. The appeals say that "the Russian people of Donbass were deprived of their homeland, the vast Russian lands were taken away, they were forbidden to speak their native language and honor their heroes", that "Ukrainian nationalists as part of punitive battalions came to our land to suppress our will and knock out everything related to Russia".

ОБРАЩЕНИЕ

Уважаемый Денис Владимирович!

Обращаюсь к Вам с просьбой инициировать процедуру референдума о принятии Донецкой Народной Республики в состав Российской Федерации!

Пришло время воссоединения с нашей матушкой Россией.

Многие из нас сделали свой осознанный выбор в поддержку нашей Республики 11 мая 2014 г., с надеждой, что в скором времени мы сможем войти в состав Российской Федерации, как это произошло в Крыму. Однако процесс затянулся на долгие годы.

Преступная украинская хунта, пришедшая к власти с помощью госпереворота, не захотела признать наш выбор. Украинские националисты в составе карательных батальонов пришли на нашу землю, чтобы подавить нашу волю и выжить из нас все, что связано с Россией. Украина бросила против нас авиацию, танки и другое тяжелое вооружение. Запад продолжает разжигать огонь ненависти к братскому народу и разрушать культурные ценности. Более восьми лет Донбасс пытаются стереть с лица земли, уничтожаются наши дома, гибнет мирное население и защитники нашей Республики.

Сколько можно ждать? Сколько еще должно погибнуть наших людей, чтобы нас услышали?

Мы просим Вас инициировать процедуру проведения референдума о принятии нашей Республики в состав России!

ОБРАЩЕНИЕ

Уважаемый Денис Владимирович!

Тридцать лет назад, после распада Советского Союза и провозглашения независимости Украины, нас, русских людей Донбасса фактически лишили Родины. Постепенно нам стали запрещать говорить на родном языке, чтить своих героев, у нас отняли бескрайние русские просторы, необычные земли и природные богатства. Но убить в нас русскую душу так и не удалось!

Восьмь лет назад, когда в результате вооруженного переворота к власти в Киеве пришли нацисты, наш народ провозгласил создание Донецкой Народной Республики, а затем и проголосовал на референдуме за независимость от Украины. К сожалению, киевский режим не признал волю народа и объявил войну непокорному Донбассу.

Теперь, при поддержке руководства Российской Федерации и Министерства обороны России, Донецкая Народная Республика возвращается на свои конституционные границы.

И сейчас народ Донбасса мечтает вернуться к себе домой, в состав Большой Родины – России. Только такая могучая и сильная страна, как Российская Федерация может гарантировать суверенитет и обеспечить безопасность своих граждан. Только вместе мы преодолеем все трудности и восстановим наши города, мы построим счастливое будущее для наших детей и внуков!

Согласно Конституции ДНР, источником власти в Республике является ее народ. Высшим непосредственным выражением власти народа являются референдум и свободные выборы.

В связи с вышесказанным прошу Вас инициировать проведение референдума о вхождении Донецкой Народной Республики в состав Российской Федерации. Русские Донбасса хотят наконец-то вернуться на Родину!

According to the SSU, more than 1,000 activists are already active in this "public movement", who meet daily with the residents of the temporarily occupied territories. In order to strengthen the electoral support, occupiers offer food packages, starter packages for Russian mobile operators.

Due to the expansion of the geography of the activities of the organization Donetsk Republic, it is planned to change its name, presumably to Greater Russia; design of T-shirts of "promoters" have been prepared.

In order to cover the preparations for the "referendum", it is planned to use media resources controlled by the Russian authorities in order to reach more than 50 million viewers from Russia and eastern Ukraine with propaganda.

<https://bit.ly/3zU0Q9F>

- In Rovenky, Luhansk oblast, rallies have begun in support of the "referendum" on joining the so-called LPR to the Russian Federation. During the events, local residents are given a special issue of the Respublika newspaper dedicated to this topic.

<https://t.me/uniannet/65412>

ELEMENTS OF TERROR

FROM THE SIDE OF OCCUPATION

ADMINISTRATIONS IN OCCUPIED TERRITORIES

- By order of the so-called "head of the Kakhovka administrative district", Volodymyr Leontiev, the control over the access to the territory of the Kakhovka district was strengthened. Permission has been given for searches, detention and restriction of freedom, which can be carried out at the discretion of the occupiers. Residents of the occupied settlements of Kherson oblast were warned about increased penalties for the curfew violations. Offenders are threatened with execution on the spot.

<https://t.me/DIUkraine/924>

- On July 18, Russian occupiers broke into the dining room No. 18 of the Zaporizhzhya NPP during a dinner of Ukrainian nuclear workers and, threatening the plant staff with weapons, drove them out of the building. It should be noted that under the conditions of occupation, under constant pressure from the military of the Russian Federation, at the risk of becoming a victim of Russian torture, ZNPP personnel continue to ensure the nuclear safety of Ukraine and all of Europe.

https://t.me/energoatom_ua/8258

- In Melitopol, Russian troops prevent people from leaving the city. A bribe from 100 to 500 dollars is demanded for skipping the line through Vasylivka; people are thoroughly searched, things and valuables are taken away. According to Melitopol Mayor, Ivan Fedorov, about 60,000 people still live in the occupied city. There is no centralized evacuation - the Russians do not agree on humanitarian corridors, wanting as many residents as possible to remain in the city, and to use them as a human shield during the offensive the Armed Forces of Ukraine.

<https://bit.ly/3oQTddV>

- The SSU has collected evidence of nuclear terrorism by the invaders in the territory of the exclusion zone. By turning the Chornobyl nuclear power plant into a temporary military base during the period from February 24 to March 31, 2022, the Russian Federation grossly violated the provisions of Geneva Convention, which expressly prohibits attacks on nuclear facilities during an armed conflict.

Investigators noted the following violations of nuclear safety standards:

- damage to premises and mining of the territory;
- blocking regular external monitoring of radiation and the continuous supply of spare parts, fuel and consumables;
- keeping staff in stressful conditions, which could lead to an increase in the likelihood of professional errors.

The territory of the exclusion zone has not yet been cleared of mines, which undermines the integrity of the radiation safety system of the facility, which Ukraine has been building for decades together with international partners. There is still a high probability of uncontrolled explosions and fires caused by them.

<https://bit.ly/3d5BM6R>

- **Russian servicemen demand that the administration of the Zaporizhzhya NPP open turbine islands for them at the 1st, 2nd and 3rd power units of the plant to place their military arsenal there - tanks, trucks, weapons, ammunition.** When it is placed in the turbine islands, access of fire equipment to three power units will be blocked, and in the event of a fire, the risk of which is increased, its extinguishing will be difficult due to the impossibility of specialized transport access.

The storage of weapons and explosives directly in the turbine islands of the power units of Europe's largest nuclear power plant violates all norms and requirements for nuclear and radiation safety of nuclear power plants.

https://t.me/energoatom_ua/8293

- **Human rights activists from Human Rights Watch documented the crimes of the invaders in southern Ukraine.** They interviewed 71 respondents in Kherson and Zaporizhzhya oblasts, who spoke about 42 cases when Russian forces detained people incommunicado or when people disappeared after being detained. Interviewees said that they were tortured or they witnessed torture in the form of beatings, and in some cases, electric shocks. Injuries are said to have included severe burns, cuts, concussion, damaged blood vessels, broken teeth, and broken bones, including ribs.

A Human Rights Watch report documented the torture of three members of the Territorial Defense who were being held as prisoners of war, two of whom died.

<https://bit.ly/3Q9wFko>

- **In Kherson, the Russian military seized a passenger ship, which was moored on island Karantynnyi, and are using it as a crossing over the Dnieper River in the area of the damaged Antonivskyi Bridge.**

<https://bit.ly/3vZCycf>

- **On July 29, the Smart Holding investment group, whose beneficiary is Vadym Novynskyi, a former people's deputy from the Opposition Bloc party, announced that the control over the Kherson shipyard is lost, which is one of the leading shipbuilding enterprises in Ukraine.** Currently, the shipyard is captured by the military of the Russian Federation, who do not allow the administration and workers to enter its territory. The director general of the Smart Maritime Group LLC, which includes the Kherson shipyard, filed a complaint about the seizure of the enterprise to the law enforcement agencies of Ukraine.

<https://smart-holding.com/uk/press-centre/news/2677>

- **About 10-15% of the population remains in the occupied settlements of Luhansk oblast.** According to the head of the Luhansk Oblast Military Administration, Serhii Haidai, the Russians are drafting the remaining men, sending them to war with their compatriots. Some of them go to war voluntarily. There are cases when men, ignoring numerous warnings about covert mobilization and believing the announcement of a job offer with high wages, go to the trenches a few days later.

<https://t.me/luhanskaVTSA/4373>

FILTRATION CAMPS AND DEPORTATION OF CITIZENS OF UKRAINE

- From the captivity of the so-called DPR there were released 32 volunteer drivers, who in late March - early April were transporting humanitarian aid from Zaporizhzhya to Mariupol, and the organization of evacuation convoys. On their last exit at the checkpoint of Mariupol, the volunteers were detained by the Russian military and taken under escort to Mykilske settlement, and later to the former penal colony No. 120 in the occupied village of Olenivka, Donetsk oblast, where they were unlawfully held for more than three months. On July 21, a press conference was held in Warsaw, at which three of the 32 volunteer drivers released from captivity spoke about the circumstances of their detention and the conditions of their captivity.

- According to them, the prisoners are kept in abandoned buildings that have not been used since 2010. There is no running water, sewerage is made in such a way that excrement is collected in a drain pit, the fetid smell from which was sensed both day and night.
- In the spring, the buildings were constantly cold. Some rooms had shelves for seating, others did not, which forced the prisoners to sleep on the floor. People got sick, they were not provided with medical assistance, there were no even basic medications.
- The cells were overcrowded, in a room designed for 8-10 people, there were more than 50 people at the same time. They had to sleep in turns, it was almost impossible to go to the toilet.
- Each prisoner was allocated 150-200 grams per day, but even in this amount it was not given every day. There was also a shortage of technical water - it was carried by the prisoners themselves in 30 liter bottles. They were fed with gray bread, as well as "some kind of swill with sprats," which was brought in dirty, used dishes.
- The detainees were not allowed to go to the toilet for the first weeks, which was a special kind of torture. There were no feminine hygiene products in the cells. The sounds of beatings, the cries of men, their pleadings to stop the torture were constantly heard.
- Volunteer Kostiantyn Velychko was detained by the "organized crime department", according to him during his captivity other prisoners, former military and civilians, told him that they were subjected to physical torture - they would be put on the table with electrodes attached to their toes, sprinkled with water and then shocked with electricity.

To release the volunteers, an information campaign Volunteer is not a Terrorist was launched. In total, there were 33 people on the list of detainees. Volunteer Serhii Tarasenko is still in captivity.

<https://bit.ly/3vD9QNN> | <https://bit.ly/3zxRjDI>

- According to the head of the National Center for Defense Control of the Russian Federation Mikhail Mizintsev, as of July 20, from the beginning of the war from the territory of Ukraine 2,897,868 people out of which 459,890 are minors were transferred to the territory of Russia and the so-called LPR and DPR.

<https://bit.ly/3ORff0V>

- Dariia Herasymchuk, plenipotentiary adviser to the President of Ukraine on the Rights of the Child and Child Rehabilitation, noted that at the moment it is impossible both to name the exact number of children deported to the occupied territories or to Russia, and to refute / confirm the figure indicated by the Russian Federation. According to Herasymchuk, as of July 20, the number of appeals to the National Information Bureau regarding the deportation of children is 5,100. The Ombudsman said that from August 1, the information platform Children of War starts its work; on this platform the information about children during hostilities will be updated on a daily basis.

<https://bit.ly/3OVJ9ee>

ABDUCTION OF CIVILIANS

- **Abductions of Ukrainian nuclear staff continue at the captured Zaporizhzhya Nuclear Power Plant.**

On July 17, Ihor Kvashyn, head of the ZNPP environmental protection service, was abducted. On July 18, the Russian military took away Serhii Pykhtyn, deputy head of the decontamination shop for operation and management of radioactive waste, and Olena Riabtseva, foreman of the decontamination shop, to an unknown destination. The whereabouts of the abductees are currently unknown.

https://t.me/energoatom_ua/8228

https://t.me/energoatom_ua/8261

- **On July 22, Oleksii Kyselov, the former commander of the Slavutych ship of the Ukrainian Naval Forces and is currently an activist and volunteer, was kidnapped in Henichesk.** According to his son, Oleksii is in the Simferopol pre-trial detention center, he is charged with "participation in a terrorist organization", meaning the Noman Çelebicihan battalion, to which the detainee provided humanitarian assistance.

<https://bit.ly/3bz4f4i>

- **In Mariupol, in the area of Hurov Park, a 22-year-old girl was detained for wearing blue and yellow ribbons in her hair.** The containment ended with threats, a warning and putting her under special control.

<https://t.me/andriyshTime/1861>

<https://t.me/andriyshTime/1870>

HUMANITARIAN SITUATION IN OCCUPIED SETTLEMENTS

- Residents of Livoberezhnyi district and remote microdistricts of Kalmius district of Mariupol, whose houses were badly damaged by Russian shelling, have to organize their lives on the street. People have brought out surviving furniture, children's toys, utensils for cooking on a fire to the yards of the destroyed high-rise buildings; field kitchens are deployed in the open air. Mariupol residents build summer showers from improvised means right near the entrances.

<https://t.me/andriyshTime/1993>
<https://t.me/andriyshTime/2035>
<https://t.me/andriyshTime/2057>

- According to the “deputy head” of the occupation administration of Kherson oblast, Kyrilo Stremousov, at his request, the work of the Google search engine, as well as the YouTube video service and the Viber messenger, was blocked. The reason is “the use of these networks as elements of information terrorism by the Ukrainian authorities and their American curators.”

<https://www.rbc.ru/rbcfreenews/62dae84d9a79470b9e356716>

- According to GUR MoD, in some settlements in the temporarily occupied territories of the Donetsk oblast, the Russians place buses in which the so-called “mobile medical clinics” are equipped. It is alleged that their task is to treat local residents. There are known facts that while being checked up at such “points”, patients are forced to donate blood for the needs of “defenders of the DPR army and Russian military personnel fighting in Ukraine.”

<https://t.me/DIUkraine/971>

- In the occupied territories of the Kharkiv oblast, the payment of pensions in Russian rubles has begun.

<https://bit.ly/3zrjiFb>

- In Mariupol, a sample of drinking water from the containers where city residents collect it for their needs, was taken and, in compliance with all transportation rules, delivered to the bacteriological laboratory of the Zaporizhzhya Center for Disease Control and Prevention for analysis. The results of the study showed that the water does not meet the hygienic requirements for drinking water, since coliform bacteria, which belong to the bacteria of the Escherichia Coli group, were identified in it. This water is not sufficiently disinfected for consumption by people.

ПРОТОКОЛ №722 від 20.07.2022

- In the occupied Severodonetsk there is no electricity, gas and water supply. Residents of the city are forced to bake bread over campfires in the courtyards of destroyed high-rise buildings and eat fish caught in the Siverskyi Donets.

<https://t.me/kazansky2017/3464>

- Spontaneous burials began to be put in order in Rubizhne - the remains of 10 residents of the city were seized. Hundreds of residents of Rubizhne remain buried near their own homes. At the moment, only officially established victims of the Russian invasion, there are more than 400 people. The city does not organize the removal of garbage that has accumulated in the yards since the spring. Spontaneous dumps are situated in almost every block.

<https://t.me/luhanskaVTSA/4594>

- Employees of the internal affairs bodies of the Russian Federation arrived in the occupied territories of Kherson and Zaporizhzhya oblast in order to organize the work of the “temporary departments of the Ministry of Internal Affairs of Russia” and provide practical assistance to local law enforcement agencies.

<https://t.me/mediamvd/12837>

- In Prymorskyi district of Mariupol, the construction of multi-storey buildings from prefabricated concrete “boxes” continues. According to the advisor to the Mariupol Mayor Petro Andriushchenko, the construction of houses is in haste, without observing building code standards and regulations.

- The so-called State Defense Committee of the DPR adopted two resolutions:
 - on the approval of the Procedure for the demolition of buildings and structures damaged as a result of hostilities, according to which information about the objects to be demolished is subject to mandatory publication on the official website of the local administration. The "document" does not contain clarifications regarding the timing between the decision to dismantle and the demolition itself, the removal of personal property, the provision of temporary or permanent shelter to people from demolished houses.
 - on the approval of the Procedure for organizing work on access to premises without obtaining the consent of the owner, according to which, in the event of a long absence of the owner of the apartment (at least 24 hours), access is allowed, that is in fact just breaking into the premises. The duration of the absence is established by interviewing neighbors or by the results of three visits with an interval of at least 6 hours. The "document" provides that access to the premises without the consent of the owner can be carried out only if there is objective information about the danger of emergency situations.

- In Mariupol, a plan for the demolition and repair of houses in the Central District of the city in microdistricts 17-23 was prepared. By winter, it is planned to dismantle 35 apartment buildings, 12 of them are assigned to the first stage. There are no plans for major or current repairs of apartment buildings, only kindergartens and schools will be repaired selectively. According to Petro Andriushchenko, the advisor to the Mariupol Mayor, due to the dismantling of about 3,700 apartments, about 8,000 people de facto remain homeless, of which at least 1,500 remain in the city. The situation is similar in other districts. Mariupol City Council has published a list of houses to be demolished.

- Permanent Representative of the President of Ukraine in the Autonomous Republic of Crimea Tamila Tasheva said that representatives of the occupation administrations in Crimea and Sevastopol are conducting "mobilization campaigns" to prepare military reserves for participation in the war in Ukraine.

According to her, the main mechanism for attracting residents of the occupied Crimea to the war is military recruiting at universities, where, for eight years of study, active militaristic propaganda of young people has been carried out to further involve them in signing contracts with the Russian army.

Tasheva stressed that within the framework of the next drafting campaign, the Russian Federation drafts even students who have a draft deferment. The representative office has information that in Sevastopol and Dzhankoy, final-year students of vocational schools were requested to come to the military commissariats, allegedly to clarify their personal data, where they were sent for medical examinations, after which everyone was handed conscription notices. In order to ensure this mechanism, accelerated graduation was carried out in vocational schools.
