Annex 49

Regions of Ukraine in which facts of shelling of healthcare facilities were recorded, indicating the number of such cases

Introduction

On February 24, 2022, the Russian Federation launched a full-scale military invasion of Ukraine along the entire line of the common border, as well as from the territory of Belarus and the occupied Crimea. Missile and air attacks target critical infrastructure facilities and homes of civilians throughout Ukraine. As a result of shelling by the Russian army of settlements, medical facilities located in them received damage of varying severity.

According to the information of the Minister of Health of Ukraine Viktor Lyashko, as of May 14, 616 healthcare facilities were damaged, 101 hospitals were destroyed beyond the possibility of restoration; 375 pharmacies were damaged; 10 medical workers were killed, more than 40 were injured.¹ Approximately 200 ambulances were shot at or hijacked.²

In 2014–2015, healthcare facilities in the Luhansk and Donetsk oblasts were repeatedly shelled by illegal armed groups supported by the Russian Federation, which was documented by the Luhansk Regional Human Rights Centre “Alternative” and presented in the report “Prohibited Target: Medical Facilities under Shelling”.³ Subsequently, on the basis of the materials collected, a submission was prepared to the International Criminal Court.

The shelling of healthcare facilities is a gross violation of international humanitarian law. In accordance with paragraph “e” Art. 23 of the Regulations concerning the Laws and Customs of War on Land, that is an annex to the Convention (IV) respecting the Laws and Customs of War on Land 1907,⁴ and paragraph 2 Art. 35 Protocol Additional to the Geneva Conventions of 12 August 1949 (Protocol I)⁵ it

is prohibited to employ weapons, projectiles and material and methods of warfare of a nature to cause superfluous injury or unnecessary suffering. International law has established restrictions on the ways in which permitted weapons can be used and methods of warfare — it is forbidden to attack or bomb undefended cities, towns, residential buildings or structures, including hospitals, military hospitals, etc., provided that these buildings and cities are not used for military purposes.

On March 13, UNICEF (United Nations International Children's Fund), UNFPA (United Nations Population Fund) and WHO (World Health Organization) issued a joint statement calling for an “immediate and complete end to attacks on healthcare facilities in Ukraine that result in the death and serious injury of patients and healthcare workers, destroying vital health infrastructure and forcing thousands of people to refuse to seek health care despite the catastrophic need for it.”⁶

On May 7, WHO Director-General Tedros Ghebreyesus, during a visit to Ukraine, stressed that WHO would do everything possible to support the Ukrainian authorities in their efforts to treat the injured, provide medical services to the population, and strengthen the country's healthcare system.⁷

This publication, prepared by the Luhansk Regional Human Rights Centre “Alternative”, provides **a brief summary of the shelling of 65 healthcare facilities by the Russian military between February 24 and May 31, 2022.**⁸ Information obtained from open sources, in particular, national media, social networks, statements by officials and public eyewitness accounts.⁹

6 <https://www.who.int/ru/news/item/13-03-2022-stop-attacks-on-health-care-in-ukraine>

7 <https://news.un.org/ru/story/2022/05/1423422>

8 Summarized information on healthcare facilities subjected to shelling by the Russian army is presented in the Annex on page 49.

9 The information contained in the publication is not exhaustive.

**Table 1 — The number of recorded cases of shelling of healthcare facilities in
different oblasts of Ukraine**

Chernihiv oblast	6	
Donetsk oblast	8	
Kharkiv oblast	13	
Kherson oblast	2	
Kyiv and Kyiv oblast	7	
Luhansk oblast	14	
Mykolaiv oblast	5	
Sumy oblast	2	
Zaporizhzhya oblast	5	
Zhytomyr oblast	3	

Key Observations

Considering the number of healthcare facilities that have been and are currently being attacked by the Russian army, the nature of the damage and the weapons from which the shelling was carried out, it can be assumed that the actions of the Russian military during the attacks, which lead to the destruction of healthcare facilities in Ukraine, in the majority cases are deliberate and aimed at creating obstacles to the Ukrainian defense in providing medical care to both civilians and the military.

It should be noted that the vast majority of healthcare facilities were damaged/destroyed as a result of armed attacks by the Russian army in the first months of the full-scale Russian aggression against Ukraine. The facts of shelling of medical infrastructure facilities were recorded in all regions in the direction of which the Russian offensive was carried out. Some facilities have been attacked by the Russian Federation repeatedly.

To strike at critical infrastructure, including Ukrainian healthcare facilities, Russian military personnel use missile systems, heavy artillery, multiple launch rocket systems, which are weapons of indiscriminate action. In areas where there are no air defense systems of Ukraine or their number is not enough to protect the airspace, the work of Russian aviation was recorded – air bombs were dropped on medical facilities in Mariupol, Chernihiv, etc.

When hospitals, outpatient clinics, hospitals are attacked there is a threat to the life and health of not only medical workers and patients, but also people who use the bomb shelters equipped in these facilities to hide from shelling by the Russian army. The exact number of victims as a result of such shelling at the moment is not possible to establish.

The attacks of the Russian army on the medical infrastructure of Ukraine have serious negative consequences for the future development of medicine in Ukraine. In addition to the partial and complete destruction of buildings of healthcare institutions, in a number of cases, expensive medical equipment was damaged

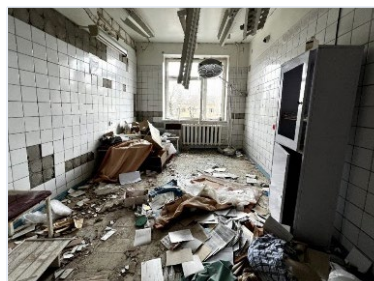

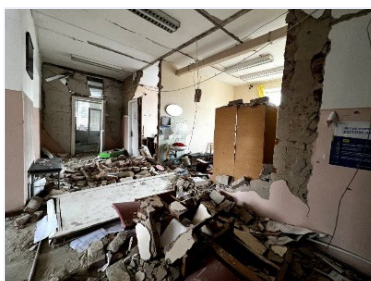

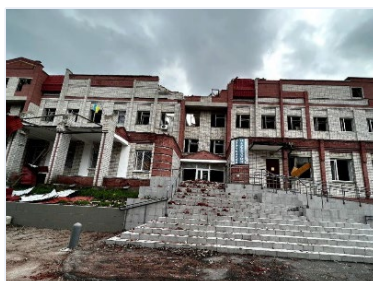

or completely destroyed. Some healthcare workers, saving their lives and health, leave dangerous regions, become internally displaced persons within the country, or go abroad, becoming refugees. As a result of shelling by the Russian army, the facts of death and injury of medical professionals are known. The lack of qualified personnel negatively affects not only the quality and efficiency of health care in war zones, but also the functioning of the healthcare system as a whole.

Chernihiv oblast

Chernihiv, Shevchenka Street, 114, Central District Hospital, 51.50766915600888, 31.33887949761252

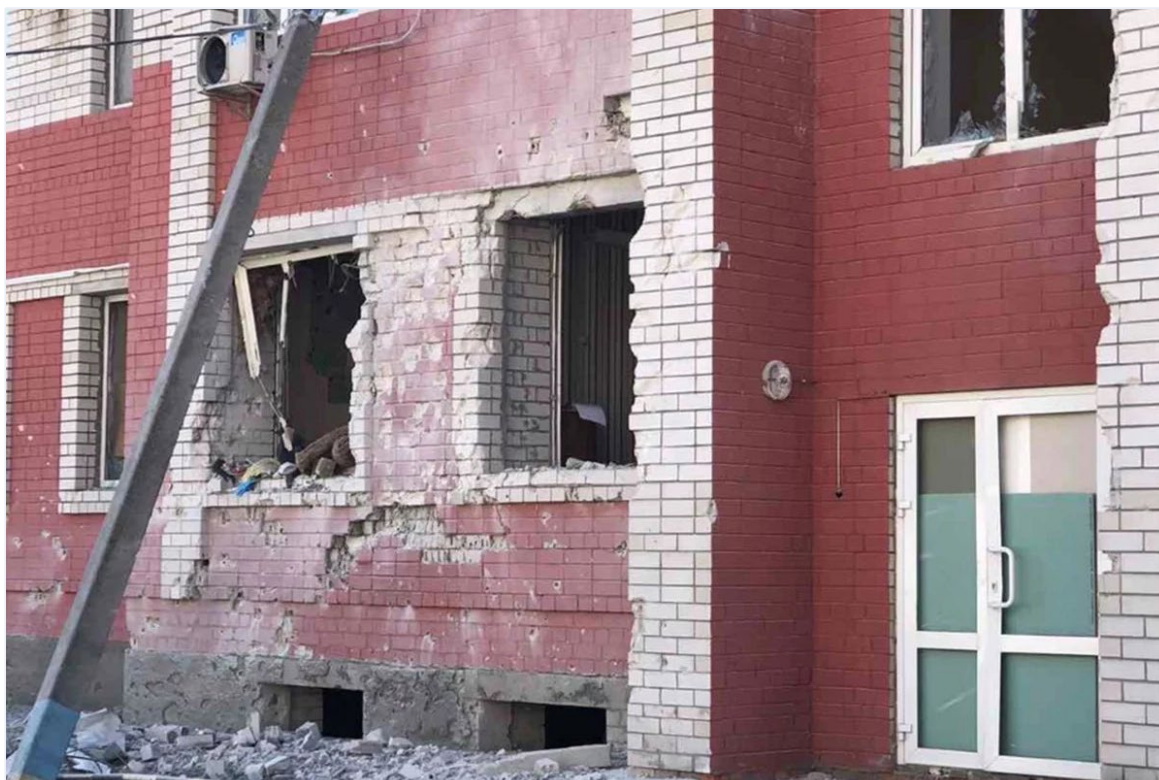

➔ **On March 2**, the Chernihiv Central District Hospital was fired upon – a cruise missile hit the building. One person died, five were injured¹⁰.

¹⁰ <https://t.me/suspilnechernihiv/6568>
<http://www.chernigiv-crl.com>

Chernihiv, 1 Travnia Street, 168, City Hospital No. 2, 51.51725636682965, 31.309584282033427

- **On March 16**, several shells exploded on the territory of the 2nd city hospital of Chernihiv. The emergency department located on the ground floor was destroyed. Windows on all nine floors of the building were shattered from the shock wave, which forced the postoperative patients to stay in the corridors of the hospital, where the temperature did not exceed 10-11°C¹¹.

Chernihiv, Myru Avenue, 211d, Oblast Clinical Hospital, 51.527185582974234, 31.272877140797995

- **On April 1**, the Chernihiv Oblast Hospital came under artillery fire. The building of the oncology department was completely destroyed. Three people were heavily injured¹².

¹² <https://bit.ly/38BHknO>

Chernihiv, Myru Avenue, w/n, Oblast Anti-tuberculosis Dispensary, 51.5467011750742, 31.254962066147986

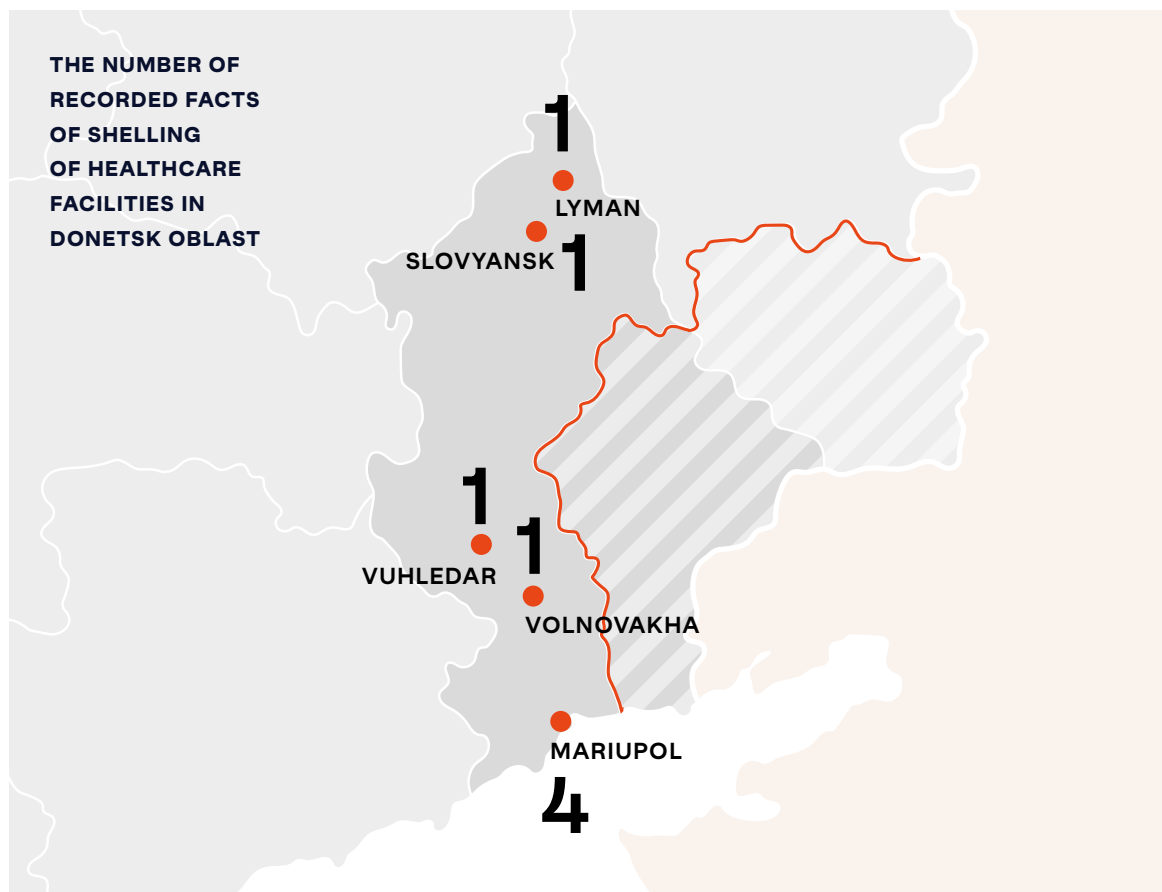

Chernihiv, Vyacheslav Chornovil Street, 24, Oblast Cardiological Center, 51.4998213586305, 31.279454122806424

Chernihiv, address to be specified, Diagnostic Center for Chernobyl-affected Persons

- According to Tetyana Lebedeva, deputy head of the Health Department of the Chernihiv Oblast Military Administration, three medical facilities in Chernihiv cannot be restored due to severe damage – the tuberculosis dispensary, the cardio center, which was hit by an air bomb on March 3, and the diagnostic center for Chernobyl-affected persons¹³.

¹³ <https://bit.ly/3NzAhLb>

Donetsk oblast

Vuhledar, Molodizhna Street, 19, Central City Hospital, 47.77596535672703, 37.23927829692302

- On February 24, as a result of the shelling of Vuhledar by Russian troops, the central city hospital was damaged. Four people were killed, ten were injured, six of which were medical workers¹⁴.

Volnovakha, Matrosov Lane, 5, Central District Hospital, 47.61272759706705, 37.487415862201004

- On February 27, the central district hospital in Volnovakha was shelled, this hospital was a health care center for about 100,000 people during the peacetime.

¹⁴ <https://www.facebook.com/pavlokyrylenko.donoda/posts/49364112318448>

The department on the top floor was destroyed by a strong explosion, at the place of otolaryngology department – a huge hole in the wall. At the time of the attack, the hospital was filled with doctors, patients and just civilians seeking shelter. The first attack was followed by others, the strongest of which was on the night of March 1. The shelling lasted about 25 minutes¹⁵.

Mariupol, Myru Avenue, 80, Mariupol Territorial Medical Association of Child and Maternal Health, 47.0975161722781, 37.53641245264321

- ➔ **On March 9**, the Russian army bombed the central part of Mariupol, including the Child and Maternal Health Center, which includes the Children's Consultative and Diagnostic Polyclinic and the maternity ward of the city hospital No. 3. Medical facilities were actually completely destroyed. Three people were killed, including a child, and at least 17 were injured. Later, a pregnant woman, whose photo on a stretcher flew around the world, died along with her child.

¹⁵ <https://bit.ly/3wyTx5C>

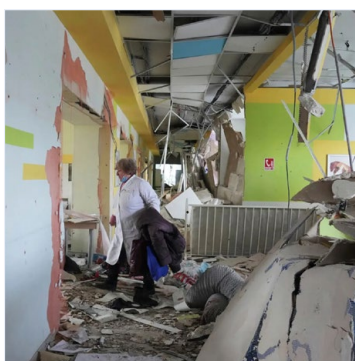

A huge crater was found in the courtyard of the hospital, which could not be left by a weapon of indiscriminate action – “Grad” or another system of volley fire, which indicates the aiming of the strike. Presumably, a high-explosive aerial bomb weighing 500 kg was used during the shelling. On March 10, photographs of the aftermath of the attack appeared on the pages of the world media.

The Ministry of Foreign Affairs of the Russian Federation stated that “there were no women, no children, no health care providers in the maternity hospital for a long time. The building was occupied by Azov fighters along with other radicals and set up their stronghold there.” The Russian Embassy in London noted that the photographs of a pregnant woman being taken out of a hospital shelled by Russian forces are “staged”.

The Russian Ministry of Defense claimed that “the alleged airstrike was a completely orchestrated provocation to maintain the anti-Russian excitement among the Western audience.”

Yevgeny Maloletka, a photographer for the international news agency Associated Press, who was the author of photographs of the destroyed maternity hospital, said that ordinary patients were in the hospital, and not a “battalion of militants.” President of Ukraine Volodymyr Zelensky called the air raid of Russian troops on the maternity hospital in Mariupol an atrocity and once again called on the international community to close the sky¹⁶.

Mariupol, Troitska Street, 46, Oblast Intensive Care Hospital, 47.111742130910145, 37.51281137413577

- On March 15, a report appeared from an employee of the Oblast Intensive Care Hospital in Mariupol that the Russian military had rounded up about 400 residents of neighboring houses to the medical facility and were not allowing anyone to leave it. The staff and patients are forced to constantly stay in the basement of the hospital, which recently suffered from shelling – floor slabs fell in the main building¹⁷.

Mariupol, Pashkovskoho Street, 4, Matsuka City Hospital No. 4, 47.11011068285405, 37.63374640657905

- On March 20, during the shelling of the territory of the Mariupol City Hospital No. 4, the 63-year-old head of the children's infectious diseases department was killed. In the morning, the doctor left the shelter of his building to take boiling water in a kettle to the shelter of the neighboring infectious diseases building, where there were people. There were about 10 meters between the buildings. Near the building where the man was heading, there was an explosion from an airstrike, as a result of which he was thrown back. Colleagues tried to resuscitate him, but with success. The doctor died in their arms from a brain injury. He was buried between two buildings, two meters from the place of his work¹⁸.

Mariupol, Meotyda Boulevard, 20a, Center for Comprehensive Rehabilitation of Persons with Disabilities No. 2, 47.10088577707636, 37.63317946255484

- On March 25, as a result of shelling, the Center for Comprehensive Rehabilitation of Children with Disabilities No. 2 in the city of Mariupol was destroyed. This state-of-the-art healthcare facility was opened in autumn 2021 following a renovation by the City Council in collaboration with the European Investment Bank¹⁹.

Lyman, Kostiantyn Hasyiv Street, 36a, Donetsk Oblast Trauma Hospital, 48.9661220969948, 37.81115984496588

- On April 21, the Russian army fired at the Oblast Trauma Hospital in Lyman from the Uragan multiple launch rocket systems. Direct hits of shells caused a fire and destruction, both in the hospital itself and in residential buildings located nearby. The Center for Traumatology and Orthopedics which moved from Donetsk to Lyman in 2014 was damaged²⁰.

Slovyansk, Zolochivsky Street, 6, Sanatorium-Resort Rehabilitation Center “Slovyansk Resort”, 48.874530142819104, 37.632511264436054

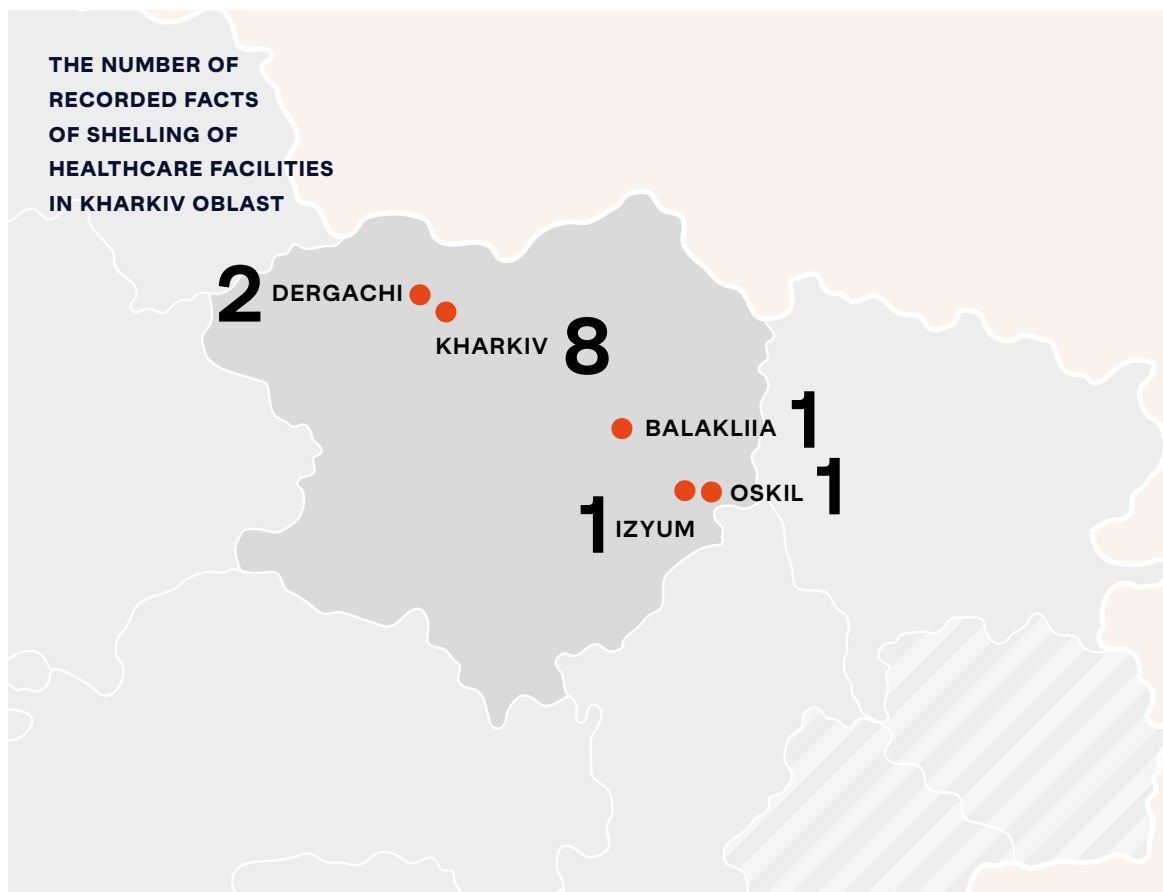

- On April 26, the armed forces of the Russian Federation carried out an air attack on the city of Slovyansk, as a result of which the building of the Slovyanskyi sanatorium and resort rehabilitation center, in particular, the hospital building, received significant damage²¹.

Izium, Zabolnychnyi Lane, 5/4, Central City Hospital, 49.1882832832976, 37.274360123070586

- On March 8, as a result of shelling, the admission department of the Izium Central City Hospital was destroyed. Patients got out of the rubble as best they could²⁵.

Oskil village, Lisova Street, 1, Psycho-Neurological Residential Care Home, 49.17082976509372, 37.4538814810634

- On March 11, a Russian shell hit one of the buildings of the psycho-neurological residential care home in the village of Oskil, Izyumsky District. As a result of the explosion, the building structures of a 5-storey building were destroyed at the level of 2 and 3 floors, local fires broke out in several places, one of the fired rockets got stuck in the wall of the building. There were 30 people from the staff and 330 patients (mostly elderly and disabled people) in the facility, of which 50 wards are

²⁵ <https://www.facebook.com/volodymyr.matsokin/posts/7675042065901336>

immobile, 10 people move in wheelchairs. At the time of the shelling, both the staff and the patients were in shelter. The building has no heat and water supply, electricity²⁶.

Derhachi, Pershogo Travnja Street, 2, Emergency Medical Department, 50.11039441269309, 36.109408073938084

- **On March 12**, as a result of the shelling of the city of Derhachi, the premises of the emergency medical department received significant damage – windows were shattered, the facade was damaged. Four ambulances were also put out of action – windows were shattered and tyres were pierced by shrapnel²⁷.

Kharkiv, City Polyclinic, address to be specified

- **On March 25**, an outpatients' clinic was shelled in the Osnovyansky district of Kharkiv, where a center for humanitarian aid was located. As a result of the shelling, four people were killed, three were injured²⁸.

Balakliia, Partyzanska street, 25, Central Clinical District Hospital, 49.44359304125089, 36.81789484459995

- **On April 2**, Balakliia District Hospital was attacked, as a result the building was partially damaged. Due to the fact that Balakliia is temporarily occupied

²⁶ <https://t.me/synergubov/2603>

Kharkiv, Pomerki, 70, Oblast Oncology Center, 50.03729126260638, 36.278680626713765

- ➔ **On May 8**, due to shelling, the Kharkiv Oblast Oncology Center was damaged again. Glass was shattered in the building, the roof was pierced, structures collapsed, inside doors were knocked out. The hospital buildings were damaged not only by shrapnel and the blast wave, but also by direct hits of shells³³.

³³ <https://t.me/synegubov/3126>

Kherson oblast

Stepanivka village, John Howard Street, 65, Kherson Oblast Psychiatric Hospital, 46.69717051242397, 32.58120380113078

- On March 10, during a night shelling, a Russian shell (presumably of the Uragan multiple launch rocket system) hit the catering unit of the Kherson Oblast Psychiatric Hospital, located in the village of Stepanivka, and did not explode. As a result of a shell hit, the catering unit was completely destroyed, there were no casualties among patients and staff³⁴.

³⁴ <https://bit.ly/3wEBaLC>
<https://bit.ly/3G7Kmw2>

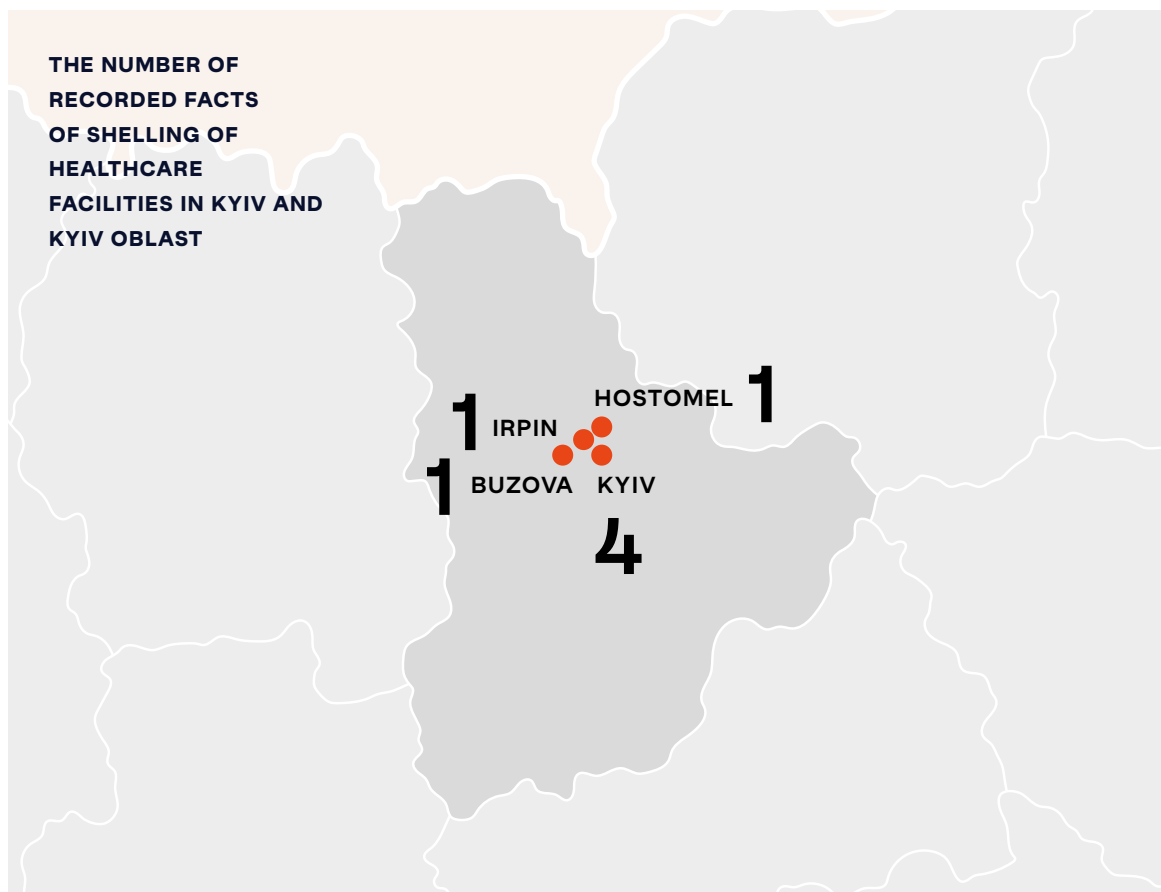

Vysokopillya settlement, Vyzvolyteliv Street, 145, Central District Hospital, 47.48701649717643, 33.52218809619565

- ➔ **On March 13**, during an artillery shelling of the Vysokopillya settlement, a shell exploded on the territory of the hospital – windows were shattered, the porch was destroyed. The Kherson Oblast Prosecutor Office is conducting a pre-trial investigation into the violation of the laws and customs of war³⁵.

³⁵ <https://bit.ly/3NsDUIR>

Kyiv and Kyiv oblast

Buzova village, Kyiv oblast, Sadovsky street, 34a, Maternity Hospital of the Adonis Clinic, 50.431063115095746, 30.037714312379872

→ **On February 28**, the private maternity hospital of the Adonis Clinic, located in the village of Buzova on the Zhytomyr highway near Kyiv, was fired upon. The facility was significantly damaged inside, staff and patients were evacuated³⁶.

³⁶ <https://bit.ly/3ly5sdz>
<https://www.facebook.com/vytalyk/posts/7128007420574778>

Kyiv, Vyacheslav Chornovil Street, 28/1, National Children's Specialized Hospital Okhmatdyt, 50.45159082466678, 30.480882102444216

- **On March 5**, as a result of a rocket attack on the territory near the children's hospital Okhmatdyt in Kyiv, the 9th floor of the central building of the facility was damaged. Children with parents and hospital staff were in shelter. The Shevchenko District Prosecutor Office of Kyiv is conducting a pre-trial investigation into violations of the laws and customs of war³⁷.

Kyiv, Miska Street, 2, Psycho-Neurological Residential Care Home in Pushcha-Vodytsia, 50.52601010597032, 30.366907436832324

- **On March 13**, a psycho-neurological residential care home in Pushcha-Vodytsia, Kyiv oblast, was hit by an artillery strike. One shell hit the boiler room – the roof was damaged, there is destruction inside. The second shell hit the morgue. As a result of the blast wave, the residential building of the facility was partially damaged as well. Staff and wards were evacuated in advance³⁸.

³⁷ <https://t.me/verkhovnaradaukrainy/7895>

³⁸ <https://t.me/KyivCityOfficial/2543>

Kyiv, Vyacheslav Chornovil Street, 28/1, National Children's Specialized Hospital Okhmatdyt, 50.45159082466678, 30.480882102444216

- **On March 16**, in Kyiv, the territory near the Children's Hospital Okhmatdyt was again subjected to shelling. The ceiling was damaged in the neurology department, and the windows in the pediatric building were shattered by the blast. According to the doctors, the explosions in the department shook beds and the floor vibrated from the blows. Shrapnel pieces were found on the balcony of the neonatal surgery department, as well as in the area next to the hospital³⁹.

Kyiv, Marshal Rybalko Street, 11b, Mediland Medical Center, 50.45558211305289, 30.475366844708102

- **On March 16**, the Mediland Medical Center was hit by shelling by the Russian army in Kyiv. The blast wave and fragments of shells knocked out windows in inpatient and outpatient departments, and damaged medical equipment. There were seriously ill and postoperative patients in the clinic who could not be transported. Mediland Medical Center in Kyiv was founded by an internally displaced person – a doctor from Luhansk. His team are the internally displaced persons from the territories of Luhansk and Donetsk oblasts occupied since 2014⁴⁰.

Luhansk oblast

Lysychansk, 40 Years of Victory Block, 12A, Luhansk Oblast Children's Clinical Hospital, 48.8617261409694, 38.4666220180107

- **On March 3**, during the shelling of the microdistrict of the RTP plant (rubber technical products) in Lysychansk, a shell exploded on the territory of the Luhansk Oblast Children's Clinical Hospital. The premises of the Verkhnyansk polyclinic of emergency medical care, which was based there, were damaged. Two ambulances were damaged as well⁴³.

⁴³ <https://www.facebook.com/sergey.gaidai.loga/posts/133329415873117>

Lysychansk, 40 Years of Victory Block, 12A, Luhansk Oblast Children's Clinical Hospital, 48.8617261409694, 38.4666220180107

- On March 4, two shells hit the Luhansk Oblast Children's Clinical Hospital in Lysychansk. The roof was damaged, the pulmonology department was destroyed, the MRI machine was damaged. As a result of the shelling, a surgeon was wounded⁴⁴.

Popasna, Soniachna Street, 35a, Popasna Central District Hospital, 48.63988064306344, 38.39938264434462

- On March 4, the Grad shelling of Popasna the Popasna Central District Hospital was damaged. The projectile exploded near the laboratory, the blast wave knocked out all the windows in the intensive care unit and the surgery operating unit⁴⁵.

Severodonetsk, Camelot residential complex, ambulance car, 48.939444, 38.541111

- On March 6, in the Camelot residential complex in the city of Severodonetsk, the Russian military shelled from Grad multiple launch rocket systems the group of medical workers who were on the road to provide medical assistance to residents of the area. The doctors were in a specialized medical transport and received mine-explosive wounds in the form of a shell shock of moderate severity⁴⁶.

**Severodonetsk, Yehorova Street, 2b, City General Hospital,
48.958936943293814, 38.49004254438726**

- On April 27, in Severodonetsk, a City General Hospital, one of two medical facilities in the Luhansk oblast that were functioning at that time, was hit by Russian shells. Three floors received varying degrees of damage. On one of them there was a direct hit of a projectile in the ward. The woman who was in it, who had previously been hospitalized with shrapnel wounds to her legs, died on the spot. The boiler room and storage facilities were also damaged on the territory of the medical facility. After the shelling in the hospital there was no light and water⁵³.

**Lysychansk, Sosyury street, 1,
Anti-tuberculosis Dispensary,
48.894484780781674,
38.475561969889455**

- On May 3, in Lysychansk, an old building of Belgian heritage, in which an anti-tuberculosis dispensary was based, was shelled, resulting in a fire. The projectile also hit the building of the Belgian Hospital, built in 1892 by a Belgian

⁵³ <https://t.me/luhanskaVTSA/2075>
<https://www.youtube.com/watch?v=c9sXliJ1YMw>

engineer and one of the most famous tourist sites in the region. The fire damaged the attic and the roof⁵⁴.

Severodonetsk, Yehorova Street, 2b, City General Hospital, 48.958936943293814, 38.49004254438726

- **On May 15**, the Severodonetsk City General Hospital came under shelling again. The facade of the building was damaged, windows were broken, the porch was broken. 9 people were injured in the shooting⁵⁵.
